### CURE & SEAL – WB

#### **Description:**

Cure & Seal – WB is a ready to use 30% solids, curing and sealing compound, formulated using “state-of-the-art” resins in a true water-base carrier. This formulation appears “milky white” in the container and when just applied, leaves a “bluish cast” on the concrete for easy visual identification of coverage. It dries clear to provide a transparent sheen finish. Cure & Seal - WB will not after yellow or change the natural color of concrete. It also significantly reduces blushing. Cure & Seal – WB provides an excellent, thicker, long lasting film finish that is resistant to most chemicals, petroleum and abrasives. When properly applied, Cure & Seal – WB yields superior curing efficiency. Cure & Seal – WB will minimize hair-checking, premature cracking, dusting and spalling, however, good concrete and good concreting practices should be used as this product is not a cure-all for improperly mixed or placed concrete. Cure & Seal – WB VOC compliant, with a VOC content of .17lbs per gallon maximum.

#### **USES:**

Cure & Seal – WB may be used wherever a thicker film, high-gloss sheen finish is desired. It may be quickly and easily applied to seal and dustproof new and old, interior and exterior, vertical and horizontal concrete surfaces. When properly applied, Cure & Seal – WB produces an impermeable seal for efficient moisture retention and is ideal for application on commercial and industrial floor, sidewalks, basement and garage floors, multi-level parking decks, patios, and driveways and parking areas.

#### **Specifications:**

ASTM C - 309, Type 1, Class B  
ASTM C - 1315  
AASHTO M-148, Type 1, Class B  
Federal Specification TT-C-0800  
USDA Accepted

#### **Application:**

Cure & Seal - WB is ready to use as is from the container. Use a typical commercial sprayer for efficient application. Cure & Seal – WB should be sprayed on with an 8001 tip in a fine, fog pattern, without spurts and dribbles, to form a thin, continuous film. AVOID PUDDLING in low areas. If puddles occur, brush or roll them out. Cure & Seal - WB may also be applied with a nap roller, soft bristle broom or lambs wool applicator.

#### **Packaging:**

1-gallon cans, 5-gallon pails, 55-gallon drums.
