Graffiti-Off

Graffiti-Off paint remover is an effective water based formula that attacks paint so it can be easily be sprayed or wiped away.

Biodegradable and **Water-Based**, this product is safe for people and the environment. It works more effectively, or better, in the same time, and costs less per ounce than most solvents.

The formula actually breaks the molecular bond between the paint and the surface and is effective for removing graffiti from all types of surfaces including: stucco, concrete, trucks, and street signs. It provides superior performance on the most difficult porous surface like natural brick and concrete.

Graffiti-Off is the first real alternative to anti-graffiti coatings and the continued painting over of graffiti.

- A simple yet effective graffiti removal system that's Water Based, **Biodegradable** and user friendly
- Packaged in handy "ready to use" 32oz spray bottle.

Works on soft, porous and hard surfaces such as:

Brick	Aluminum
Concrete	Alloys
Stone	Stainless Steel
Stucco	Metal Street Signs
Rock	Formica
Tile	Plastic
Fiberglass	Plexiglass

Before Cleaning: Test surfaces before using. Apply a small amount to an inconspicuous area. If surface marks, dulls, discolors, fades or if color transfers to a white cloth, DO NOT USE. Not recommended for used on faded or varnished surfaces, non-colorfast materials or woodwork

Directions For Use: Porous Surfaces (Brick, Concrete & Stucco):

Spray affected area, wait 3-5 minutes. Use brush to loosen dried paint. Use hose to rinse off and wipe with a clean towel. For best results on porous problem graffiti areas, use a high-pressure spray washer after - step #1.

Hard & Soft Surfaces (Street Signs, Tile, Etc.):

Spray stain thoroughly, wait 60 seconds. Wipe with clean disposable towel or cloth. Repeat if necessary.
